7	" "	24	" "
10	" "	18	" "
12	" "	10	" "

Total.....108 railroad cars

Altogether, 524 railroad cars of uranium ore were shipped out of the Jachymov mining area during the period from 13 December 1948 to 12 February 1949.

2. New deposits of uranium ore have been discovered at Radvanice, near Trutnov (051/674). Mining on a large scale has not yet started, and research work is being carried out by Ing. Isacenko. Since mid-January, 1949, three sealed railroad cars have been dispatched via Hradec Kralove and Liberec to Decin at regular weekly intervals. In Decin, they are hitched to the train coming from Jachymov which is routed through Hrensko into the Soviet Zone of occupation.
3. Pribram Mines:
 - a. Work at Mine #4 (Trebsko) has stopped, because quantities have not been large enough to make mining worth while.
 - b. The richest mine is Mine #3 (Vranc).
 - c. Mine #1* (Liluv Dul) is less promising.
 - d. Mine #1* (Sv. Hora), is very poor and mining will very probably be discontinued here.
 - e. At Mines #5 and 6, only the tailings are being exploited (Conveyor-belts).
 - f. At the beginning of January, a new mine, "Kamenna" (# 7), was opened. Its output has not yet been reported.

25X1

Comment: Apparently #2 is meant in place of #1 in either c or d.
